A new, award-winning 6-part BBC series comes to America. Enjoy an uplifting comedy-drama about romance and second chances. Childhood sweethearts Alan (Derek Jacobi) and Celia (Anne Reid), both widowed and in their 70s, fall for each other all over again when they are reunited after nearly 60 years. The celebratory tale of the power of love at any age is also a story about family — a family with baggage. Alan and Celia's daughters, whose dysfunctional lives bring drama at every turn, would never dream of getting in the way of their parents' happiness. But somehow they just can't help themselves.

U.S. v. Narciso, Perez & the Press

During a six-week period in the summer of 1975, 27 patients experienced respiratory failure and 11 patients died at the Veteran's Administration Hospital in Ann Arbor. In June 1976, after an intense FBI investigation, two Filipina nurses --- Filipina Narciso and Leonora Perez --- were charged with injecting the patients with the muscle relaxant Pavulon. Through interviews, archival footage and photos, and thousands of pages of FBI documents, this film reconstructs the trial and the movement to prove the nurses' innocence.

NOVA returns to Ground Zero to witness the final chapter in an epic story of engineering, innovation and the perseverance of the human spirit: the completion of One World Trade Center, the skyscraper rising 104 stories and 1,776 feet from the site where the Twin Towers once stood. In this update, NOVA goes inside the construction of the new tower's final floors and the installation of its soaring, 800-ton spire.

Brains on Trial *with Alan Alda*

Using a fictional crime — a convenience store robbery that goes horribly wrong — this two-part series builds a gripping courtroom drama. The program probes the brains of the major participants —defendant, witnesses, jurors, judge — while Alan Alda visits neuroscientists who explore how brains work when they become entangled with the law.

The GOP: Seize the Center or Die?

2012 was a disappointing year for Republicans. The failure to win key swing states in the presidential election and surprising losses in the House and Senate have prompted some reflection. Was their embrace of small government, low taxes and a strong conservative stance on social issues at odds with shifting American demographics? Or did the GOP embrace the right platform but the wrong candidates? Moderated by ABC's John Donvan, this provocative discussion series features passionate advocates on both sides of the issue, taking the traditional approach of Oxford-style debate on hot-button concerns of the day.

Monday, September 23 at 10 pm

Skeletons of the Sahara

Explorer and scientist Paul Sereno made an extraordinary discovery in the middle of the Sahara desert: While prospecting for dinosaur bones, he stumbled across an ancient human cemetery more than 5,000 years older than the Egyptian pyramids. Who were these people and what were they doing in the middle of the desert? How did they live and die? Go into the desert with Sereno and his team, who are excavating new burials and making new finds.
